

SMART CIVIC ISSUE REGISTER & TRACKER

Empowering citizens, enabling
transparent governance

CORE IDEA

- Citizens report public infrastructure issues.
- Track resolution in real-time with transparency.
- Bridge the gap between citizens and authorities.

CORE FUNCTIONALITIES

- **Problem reporting (photo + GPS + text)**
- **Ticket ID & live status (Pending → Resolved)**
- **Admin dashboard (assign, monitor, close)**
- **Automated SMS/push notifications**

NEXT-LEVEL INNOVATIONS

- **AI-driven complaint categorization (BERT, MobileNet)**
- **Urgency & priority scoring (school/hospital proximity)**
- **Citywide issue heatmap (Google Maps)**

WORKFLOW

Staff Assignment

Admin assigns field staff → Sets deadline → Status: "In Progress"

Field Work & Updates

Staff updates progress → Uploads work photos → Real-time status sync

Issue
Resolved?

↓ YES

Resolution Documentation

Upload completion photos → Mark status "Resolved" → Close ticket

Notification & Feedback

- SMS/Push notification to citizen
 - Request rating/feedback
- Update analytics dashboard

END: Issue Closed

Data stored for analytics, predictive modeling, and reporting

CITIZEN-CENTRIC FEATURES

- **Anonymous & secure reporting**
- **Gamified feedback & leaderboards**
- **Messaging app integration (WhatsApp/Telegram)**

AUTHORITY- CENTRIC FEATURES

- **Predictive maintenance (based on history)**
- **Sentiment analysis → escalate frustrated/critical cases**
- **Proactive resource deployment via hotspot mapping**

FUTURE SCOPE

- **IoT integration (smart sensors for lights, pipes)**
- **State/national level scalability**
- **AI chatbot for instant query handling**

IMPACT

- **Faster redressal, greater accountability**
- **Encourages citizen participation**
- **Smarter urban governance**

**THANK
YOU**
